

Scope for the Management System

Geveko Markings develop, manufacture and supply road marking and safety materials, coatings and road repair products globally, to markets within the horizontal road and decorative markings. Our products include preformed, hot-applied thermoplastics, paints and plural components, glass beads, aggregates and traffic safety equipment.

- To be known as the leading manufacturer of environmentally friendly road marking materials and systems.
- We work pro-actively to protect the environment, prevent pollution and to reduce energy and waste in our business.

- Constantly improving the environmental performance is a natural part of the daily business that engages all our employees.
- We are aware of our environmental impact and strive together to minimise our global footprint.

- Our products have the least possible impact on the environment and consumption of resources through the whole value chain.
- We benchmark our environmental activities to benefit from the accumulated knowledge and experience in Geveko Markings Group.

- We live up to our binding obligations with customers and other stakeholders, including complying with relevant legislation.
- We are transparent towards employees, customers and other stakeholders regarding our environmental impacts.

This policy is considered as a framework for the common environmental objectives within the Geveko Markings Group. In addition, each site within the Group will establish local environmental goals and action plans based on local conditions. We comply with binding obligations and relevant legislation and are committed to continuous improvement of our management system.
